- [Random Flights](#)

Scheduled Flights

To create a scheduled flight you first click on **Flight Center**, you can then click on the **Select** button next to the Scheduled Flights button.

You have two options, *Route Map* or *Route List* these will allow you to either see our map locations or a list of available flights.

Once you have chosen a location click on the **View Details** button to load the flight information.

Open Flights

Please note: pilots must have 300+ flight hours to use this feature.

To create a open flight you first click on **Flight Center**, you can then click on the **Select** button next to the Open Flights button.

You have 2 different systems to choose from, you can either select **Simbrief Flight Creator** or **Internal Flight Creator**.

if you select *Simbrief Flight Creator* you will see the following:

Using **Flight Generator** will allow you to fill out a form for your flight in which it will then synchronize with your simbrief account and then will proceed to generate your flight.

Alternatively if you select **Flight Importer** you can generate your flight on simbrief and then it will be imported into your flight.

Using the **Internal Flight Creator** will utilize our internal flight generator system.

Random Flights

Please note: pilots must have 300+ flight hours to use this feature.

To create a random flight you first click on **Flight Center**, you can then click on the **Select** button next to the Random Flights button.

Here you have a few options to help generate random flights, they are:

- Flight Departure
- Flight Duration
- Speed
- Number of flights to generate

RANDOM FLIGHT GENERATOR Dashboard > Flight Center > Random Flight Generator

Generate Flights
Generate some random flights if you have no idea where to or what to see.

Flight Departure (optional)	Flight Duration	Speed (kts)	No. To Generate
NZCH	01:00	250	5

Generate

Then click the **Generate** button, this will then generate some random flights with the data you provided.
