

Open Flights

Please note: pilots must have 300+ flight hours to use this feature.

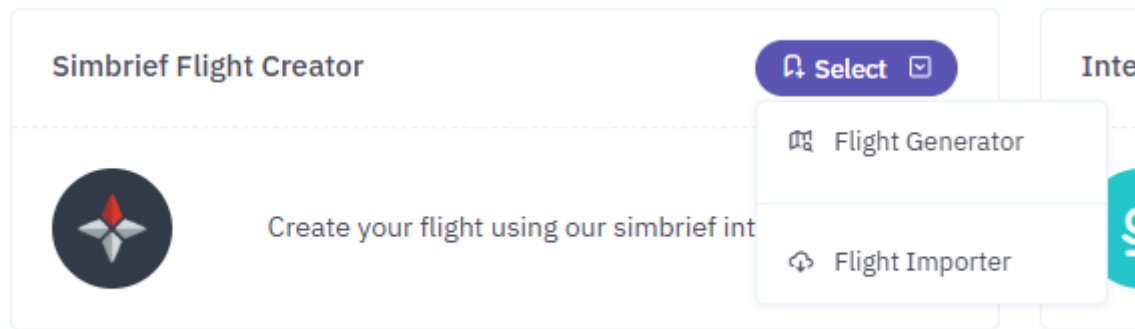

To create a open flight you first click on **Flight Center**, you can then click on the **Select** button next to the Open Flights button.

You have 2 different systems to choose from, you can either select **Simbrief Flight Creator** or **Internal Flight Creator**.

if you select *Simbrief Flight Creator* you will see the following:

Using **Flight Generator** will allow you to fill out a form for your flight in which it will then synchronize with your simbrief account and then will proceed to generate your flight.

Alternatively if you select **Flight Importer** you can generate your flight on simbrief and then it will be imported into your flight.

Using the **Internal Flight Creator** will utilize our internal flight generator system.
